## REPORT SUMMARY

### A. Facility Description

The Grand Forks County Correctional Center (GFCCC) is a grade one (1) correctional facility located at 1701 North Washington Street, Grand Forks, ND. The Grand Forks County Correctional Center is operated under the authority of the Jail Administrator, Bret L. Burkholder. Jail Administrator Bret L. Burkholder and the Grand Forks County Correctional Center are under the governing authority of the Grand Forks County Commissioners. The county correctional center is a one-story level building. The facility was constructed in 2006 and renovated in 2013.

GFCCC physical plant consists of master control and administrative offices for the Administrator, Captain, and the Lieutenant's offices. The facility has a program room in each housing area, a large vehicle sally port, booking area, observation cells, kitchen, laundry, attorney-visiting rooms, property storage rooms, IVN rooms, janitor closets, restrooms, medical treatment areas, chemical storage closets, library, three (3) inside recreation areas with louvers for outside air, interview rooms, and dayrooms. Additional administrative offices are located throughout the facility.

Services provided include ministry programs, work release, chemical dependence, life skills, Free Through Recovery, medical, commissary, food service, laundry, and library. The facility also provides the distribution of prescribed medicines, commissary, and meals are served from a full-service kitchen, laundry, and a library. Offenders eat their meals within the dayrooms of their unit. Delivery of services is an effort to reduce the likelihood of confrontations between offenders, and the facility is designed to minimize offender movement. The law library is available on a laptop in seven (7) locations throughout the facility. GFCCC's operational design concept is to receive unclassified individuals, hold pretrial and convicted persons up to a year. The facility has space to allow for processing, classifying, and releasing individuals at all times.

The master control room is centrally located within the facility, with no direct line of sight into the housing units. The master control room can take over each unit control center if needed. There are secondary control stations located in each unit. During the inspection, these secondary control stations were utilized. The master control has the capability to open the doors throughout the facility.

All offenders are housed based upon their needs and their respective levels of classification. GFCCC housing units include maximum, medium, and minimum custody classifications. Additional classification levels are protective custody and special management units. Male or female distinction of each unit is based on facility needs. Each unit has particular guidelines depending on the inmate classification. GFCCC has three (3) units, and each unit has one (1) tier with the exception of unit three (3), which has two (2) tiers. Each unit is an individual unit with six (6) smaller pods. Six (6) pods comprise a unit. Unit one (1) and two (2) contain twenty-four (24) cells in which twenty-two (22) are double-bunked. Unit three (3) contains forty-eight (48) cells, in which forty-six (46) are double-bunked. Unit three (3) has stairs in the dayroom to access the upper tier cells. Each unit contains one (1) pod with two (2) single bunk cells, which are designated as medical/A.D.A. cells. Each unit consists of the pods surrounding a central secondary control/officer station.

Each pod has dayrooms with large glass windows, which restrict visibility from the inside of the unit and gives the secondary control stations a direct view into the pods. All the units have a dayroom located in the front of the housing pods and a private shower located at the left or right side in the lower or upper tiers of each of the housing pods. The design of each shower unit allows the offenders to have privacy for showering. The recreation area is located in the center of the housing units, also there is a classroom in each of the housing units. Each cell has a washbasin and toilet in the immediate sleeping areas. Offenders assigned to a unit do have limited contact with offenders in other units during programming. Each cell is equipped with an intercom that allows offenders to communicate with staff. Each unit has basic furnishings, television, kiosks, phones, and multi-purpose areas. All housing units have adequate and appropriate seating for the number of inmates that make use of each unit. All housing units have access to natural lighting and illumination sufficient for comfortable reading in the living areas. The dayrooms allow offenders to congregate, watch television, use the telephone system, use texters, and have access to the kiosk system for visitation and ordering of commissary.

GFCCC is comprised of two (2) dorms. WR dorm has thirty-six (36) beds for work release and one (1) dorm with four (4) beds next to the laundry and kitchen areas for in-house inmate workers. Each dorm shares a community washbasin, toilet, and shower unit located off the side of the dorm. Each dorm is equipped with an intercom that allows offenders to communicate with staff. The dorms have adequate seating for the number of inmates that make use of each dorm. Each unit has particular rules depending on its designation.

The booking area has ten (10) individual holding cells, one (1) temporary group-holding cell, and

two (2) safety cells. A washbasin and a toilet are included in the holding cells. The safety cells have a flushing floor toilet mounted flush with the floor. The controls are located outside in a plumbing closet. The safety cells are used temporarily for inmates under the influence of alcohol or drugs, display violent behavior, self-harm, or inability to exercise self-control. The safety cells are located near the officer duty station. The safety/observation cells do not allow the booking officer visual observation of the entire safety cell. The entrance door to the holding cells has one (1) small window for officer observation. These windows have a cover to restrict visibility from the inside of the cell. Visual observation is accomplished face to face through observation rounds. All safety/observation cells and the group-housing unit within the booking area have cameras, intercom, and duress lights, which can be monitored by the booking officers and control staff. There is no direct visual observation from the control room into the safety cell.

GFCCC houses male and female inmates up to one (1) year or until an inmate's court case is completed. The average length of stay is twenty (20) days. Three thousand six hundred thirty six (3,636) male offenders and one thousand two hundred thirty-two (1,232), female offenders were processed for 2019. Grand Forks County Correctional Center has an authorized staff consisting of; administration five (5), security fifty-five (55), medical five (5), and maintains staffing levels of one (1) staff to eighteen (18) inmates. GFCCC maintains verbal and contractual agreements to house inmates from different jurisdictions, including U.S. Marshall Service, Bureau of Prisons, U.S. Air Force, Border Patrol, Parole and Probation DOCR, as well as the North Dakota Counties Walsh and Traill.

GFCCC has twenty-nine (29) phones located throughout the facility for inmate use and two hundred (200) individual phone/texters. GFCCC has one hundred seventy-nine (179) cameras throughout the facility. Monitoring is accomplished by electronic camera(s), which are continuously monitored. This inspector could not find where electronic surveillance was a substitute for periodic personal observations by facility employees. GFCCC has a large vehicle sally port, which can provide entry for up to eleven (11) vehicles transporting inmates and emergency vehicles. GFCCC utilizes handheld wands throughout the facility and for any individual entering the facility through the front entrance. The front entrance provides an entrance and exit for the public.

Grand Fork County Correctional Center has established guidelines for COVID-19 that address housing, quarantine, and healthcare issues. GFCCC guidelines are 1) implemented revised bond schedule to help reduce the rate of incarceration, (2) utilizing "cite and release" for people charged with misdemeanors, (3) protecting meaningful access to counsel and pretrial support, 4) providing appropriate care and hygiene to those who remain incarcerated, and 5) increase the level of sanitation requirements throughout the facility. GFCCC's long-term goals are to protect the health and safety of incarcerated individuals, staff, visitors, and the community at large.

## **B. Sanitation**

The correctional facility inspectors found the level of sanitation and cleanliness to be adequate throughout the facility. The physical plant was well maintained, with no notable physical plant issues. The correctional facility inspectors found that the offenders were provided with equipment and materials necessary to clean their assigned areas. The correctional facility inspectors found that waste and trashcans are emptied at least one (1) occurrence every day and as often as needed. For vermin or insects, GFCCC has retained a professional exterminator. The correctional facility inspectors did not find any disagreeable odors in the facility, and the offenders had access to hot and cold running water. Noise levels and temperatures were within the normal levels throughout the facility.

## **C. Audit Scope and Methodology**

Documentation reviewed for this inspection includes facility policies, procedures, forms, educational materials, grievances, training curriculum, employee training records, inmate booking

files, inmate property receipt, organizational chart, posters, PREA brochures, PREA audit, inmate handbook, operation manuals, litigation, notice of claims, and significant incidents. For the facility inspector observations, we used a limited judgmental sample and relied on our professional judgment to conclude when we observed practices. The correctional facility inspectors had complete access to the facility.
